Career Objective

I am a web developer with a vast array of knowledge in many different front-end and back-end languages, responsive frameworks, databases, and best code practices. My objective is simply to be one of the best web developers that I can be and to contribute to the technology industry all that I know and can do. I am dedicated to perfecting my craft by learning from more seasoned developers in ASAC, remaining humble, and continuously making strides to learn all that I can about development. I believe that my understanding of problem-solving and complex algorithms are also skills that have and will continue to contribute to my overall success as a developer.
